

The travel industry may never become entirely environmentally friendly, but we can contribute to reducing footprints through actions, not just impressive documents.

This is something Norway Mountain actively engages in:

- Several trips designed to start and finish in Bergen city centre, eliminating the need for additional transportation.
- NMG "Green Discount" for participants arriving at courses/trips via public transportation (bus/train).
- Guest Education - We provide teaching of our guests on the importance of protecting vulnerable ecosystems.
- Guest Education - We provide training to guests on the importance of protecting vulnerable ecosystems.
- Waste Collection - We engage in litter cleanup activities, involving guests and providing them with waste bags for responsible disposal.
- We emphasize the reuse of various products, such as second-hand skis from thrift stores like Fretex and other environmental stations, to avoid unnecessary production. Despite potential cost savings through sponsorships, we willingly pay more for used products to promote sustainability.
- Equipment Rental – We offer a range of equipment for rent.

Member and Participant in the UN Global Compact for Business, Contributing to Visit Bergen and the City of Bergen in Achieving Sustainable Development Goals by 2030

As a proud member and active participant in the UN Global Compact for Business, we are committed to aligning our operations with its principles and contributing to sustainable development.

We strive to make a positive impact on the local community and contribute to a more sustainable future. By aligning our business practices with global sustainability standards and actively supporting local initiatives, we aim to be a responsible partner.

Together we can make a difference, best regards Frank and the guide team in

Norway Mountain Guides.
